Warehouse Shelving Assembly

Step 1 -Position both uprights in the area of installation.The bottom of the uprights have flat foot plates(fig. 1&fig. 2).

Step 2 - Build the lowest shelf first.Two beams are required to create a shelf.Attach a load beam at the same height on each upright. Each beam features a built-in safe clip at each end that will click into place upon assembly.(fig. 3).

Step 3 - Add the other shelves to the unit.(Go back through Steps 2 for assistance adding each other shelf.)

Step 4 -At this point,You can add layer panels(fig. 4) and rivets(fig. 5) on the beams.
